

SUMMER AT IE

Dear Mobility Office Colleagues,

We're excited to invite undergraduate students from your University to participate in IE's Graduate Summer Program and IE Summer Certificates!

Graduate Summer Program for Undergraduate students:

As a valued partner university, we're pleased to extend a **15% discount** (€480) on the program fee for your students. To help promote this opportunity, we've included a promotional teaser for you to share: [promotional teaser](#).

The Graduate Summer Program is designed for undergraduates to dive into entrepreneurship and launch their own venture, or explore intrapreneurship, tackling challenges within established companies in exciting sectors like fashion, green energies, consumer goods, and consulting. In addition, students will develop essential soft skills, navigate diverse team dynamics, and learn from top IE professors and faculty. Beyond the academic realm, students will immerse themselves in the vibrant culture of Madrid through various extracurricular activities and team-building events.

IE Summer Certificates:

IE University's upcoming [summer certificate programs](#) includes four distinct certificates: Business Fundamentals, Data Science Fundamentals, Creative Problem Solving for Business, and Environmental Data Science. These five-week hands-on programs are meticulously designed to up-skill candidates' CVs and provide tremendous growth opportunities in their careers. We invite you to explore these enriching opportunities and empower your students to embark on a transformative journey with us this summer.

For further details about either program, please direct your students to visit our QR codes (attached) or [book a call with us](#). We appreciate your collaboration in spreading the word about the IE Summer options and look forward to welcoming your students to these unique experiences in Madrid.

Warm regards,

Flavia Fernández Ferreyra
